

Cloud Computing... What's in it for my Business?

What is Cloud Computing and how can it benefit my business?

Cloud Computing allows you to use the computer services you NEED, but you don't have to own them. Think about how you use electricity. You don't have to own a generator to provide power to your office, you simply pay for the electricity you use.

We are now at the point where you can do the same things with your **computer services!**

Cloud Computing can provide these services, that you pay for month to month, based on your actual usage.

When: Tuesday, December 7, 2010 at 11:00 am – 12:30 pm

Where: Huntington County Chamber of Commerce

Call the chamber to register at 260-356-5300 or call us at 260-359-9160.
